Purpose: Defines application navigation and page relationships.

Primary Routes:

- Homepage
- Game Library
- User Profile
- Developer Dashboard

Secondary Routes:

- Game Detail
- Collections
- Analytics
- Reviews

Usage: Use this reference for navigation structure and route hierarchy.

Asset Notes

The reference assets are intended to communicate:

- Layout structure
- Information hierarchy
- Visual direction
- User flow

The final implementation does not need to reproduce these assets exactly. They should be used as design and structural guidance for the project.
